# A Glimpse Into The Future

First Annual

Smith & Robards' Grand Exposition

July 8th, 1876

Salt Lake City, Utah Territory (Republic of Deseret)

#### Welcome To The Future!

Today was an event months, no years, in the making. For not only was it the work of the program committee, who began this task back in 1875, but it is the culmination of the years of research that these creators have been pursuing since they through their hats into the ring of scientific endeavor.

As you walk through the hall and take in the sights presented by the various booths, tables, posters, and showcases, remember that each of these wonders are the children of the human mind. That each of these are the result of that creative spark that springs forth from the fires of creation. Give thanks to the Lord for our nearness to those fires and the betterment to Mankind that we provide in return for our closeness to the Divine.

We live in unprecedented times. Times in which science has made huge strides. Indeed, our host City of Salt Lake is a beacon of scientific ingenuity. But we must not forget the human factor—the reason why we strive. For it is in remembering this that we hold back the darkness with our light.

My excitement for today's events borders on the giddy. I hope you share my enthusiasm. Rest assured that Mssrs. Smith & Robards' share my enthusiasm for this project and the inspiration it has endeavored to kindle.

Go forth and enjoy the Expo!

#### **Exposition Judges**

The judges for the First Annual Grand Exposition were selected by the Program Committee based on the following criteria:

- Expertise
- Individual contributions to their fields of endeavor
- Reputation in the field

**Dr. Lacey Mae Alcott:** Dr. Alcott is a Fellow of the Great Basin Scientific Society and holds a doctorate in Engineering from Harvard. She has had numerous papers published on the subject of automation.

**Mrs. Delilah Banks:** Mrs. Banks is an esteemed member of the Great Basin Scientific Society, and winner of the Society's Distinguished Scholar Award (1873). While she has had many papers published on a variety of topics, her primary interest is zoology.

**Dr. Owen Randall**: Dr. Randall is a biologist who hails all the way from Edinburgh, Scotland and is our special guest! Dr. Randall wishes to express his gratitude to his American hosts.

**Dr. Thaddeus Shaw:** Dr. Shaw is a surgeon and current President of the Great Basin Scientific Society. He has several patents pending for powered surgical instruments. He is well-esteemed in his field and has had numerous paper published in scientific journals across disciplines.

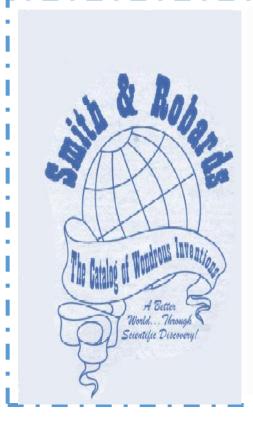

**Dr. Saul Blaumstein:** Dr. Blaumstein is a physicist from right here in Salt Lake City and a Fellow of the Great Basin Scientific Society. He has worked with the world-renowned Dr. Darius Hellstromme and is a specialist in "Ghost Rock" research.
